

## Paper Plate Crown

### You will need

Paper plate

Scissors

White glue

Things to decorate your crown with: buttons, stickers, sequins, plastic gems, small pompoms, little bows, ribbons, foam or fabric shapes, glitter glue, etc.

Fold your paper plate in half.

the three lines indicate where you need to cut slits to divide the folded plate into 4 equal sections. Stop cutting each slit at least an inch from the edge of the plate.

Unfold the paper plate. Make the final two slits along the crease. Your paper plate should now be divided evenly into 8 wedges.

Place the paper plate bottom side up. Carefully fold up the wedges to transform the plate into a crown.

Decorate your crown with glitter glue, stickers, plastic gems, sequins, buttons, felt or fabric shapes, foam or paper shapes, small pompoms, and all sorts of fun materials. Mine even has drinking straw pieces at the base!

Attach a chin strap if the crown does not fit you well. Punch a pair of opposite holes at the base of the crown. Fasten the ends of an elastic string around the holes.
